

CLEANING AND CARE INSTRUCTIONS: Ready Made Covers

CLEANING

You should remove dirt, dust and debris from your cover with gentle cleaning by wiping it with a soft cloth or sponge, using a mild liquid soap. DO NOT use any chemical cleaners or bleach on the material as this will cause the UV and water repellency treatments on the material to be diminished.

This cover is not designed for cleaning in a domestic or commercial washing machine.

FOLDING & STORAGE

Before packing your cover away for storage, ensure it is clean and completely air dried; DO NOT use a dryer.

Once the cover is clean and fully dry, lay it out onto a flat and clean surface. Fold it in half. Then fold it again, repeating until the cover reaches a manageable folded size.

For best protection, keep your cover/s in a Coverworld storage bag, available for purchase separately.

CARE & MAINTENANCE

We offer the following care products which are effective in prolonging the life of outdoor fabrics and furniture. These items are available for purchase at Coverworld.com.au and can be quickly dispatched Australia-wide.

303® Indoor/Outdoor Multi Surface Cleaner

for powerful, concentrated cleaning results without caustic chemicals or solvents. Cleans all indoor and outdoor fabrics, carpet and upholstery (safe for all water-safe materials). Rinses completely away, residue free. Use full strength or diluted with water. Contains no soaps, harsh detergents or solvents. Non-toxic, non-hazardous and odour free. Removes difficult stains including grease, fruit juice, blood, oil, ink, wine, dirt, rust and more.

303® Indoor/Outdoor Aerospace Protectant™

for the most powerful UV screening formula with SPF 40 to prevent UV caused slow-fade. Non-toxic, silicone free and biodegradable. Lasts 4-10 times longer than other products and won't wash off. Prevents drying and cracking and keeps rubber, vinyl, plastic items pliable and supple. Suitable for sail cloth, painted surfaces, plastics, chrome, glass, fibreglass, stainless steel and more - 100's of application uses including patio furniture, automotive, marine, equipment...the list goes on.

303® Fabric Guard

to prolong and protect the life of both indoor and outdoor fabrics (including fabric covers). Ideal for restoring stain and water repellency to factory new levels, and impeding mildew formation.. Recommended as the best fabric protectant by leading outdoor fabric manufacturer Sunbrella®. Add life to your fabrics and save money. Suitable for canvas, wool, upholstery, carpeting, solution-dye acrylic, natural fibres and blends, suede and silk.

MATERIAL FADING

All of our outdoor covers have been treated with additives to slow the negative effects of UV ray exposure from the sun, including fading. However over time some effects will occur and you may notice colour fade during the life of the cover. The cover is primarily designed to block UV rays from the item being covered.

WATERPROOF -V- WATER RESISTANT

Even though we have extensively tested the water resistance of the fabric, we do not advertise or sell our covers as "waterproof" because all covers are stitched with a needle (which creates small holes during the sewing process) including along the stitched seams. It is possible for water to penetrate these areas of the material.

The material has had 1200mm water-proofing treatment conducted which will become diminished from prolonged UV and weather exposure.

12 MONTH WARRANTY

The warranty applies from the date of the order. Wear and tear caused by usage is not covered by warranty and over time, the covers will change their overall appearance from the effects of weather and UV exposure.

In order to prolong the lifespan of the cover, Cleaning and Care instructions must be followed.

Modifications made to covers, and effects from extreme weather conditions, are not covered by warranty.

The lifespan of the cover will be determined by weather conditions and care taken.

The material has had 1200mm water-proofing treatment conducted which will become diminished from prolonged UV and weather exposure.
